

First AI-powered NFT marketplace

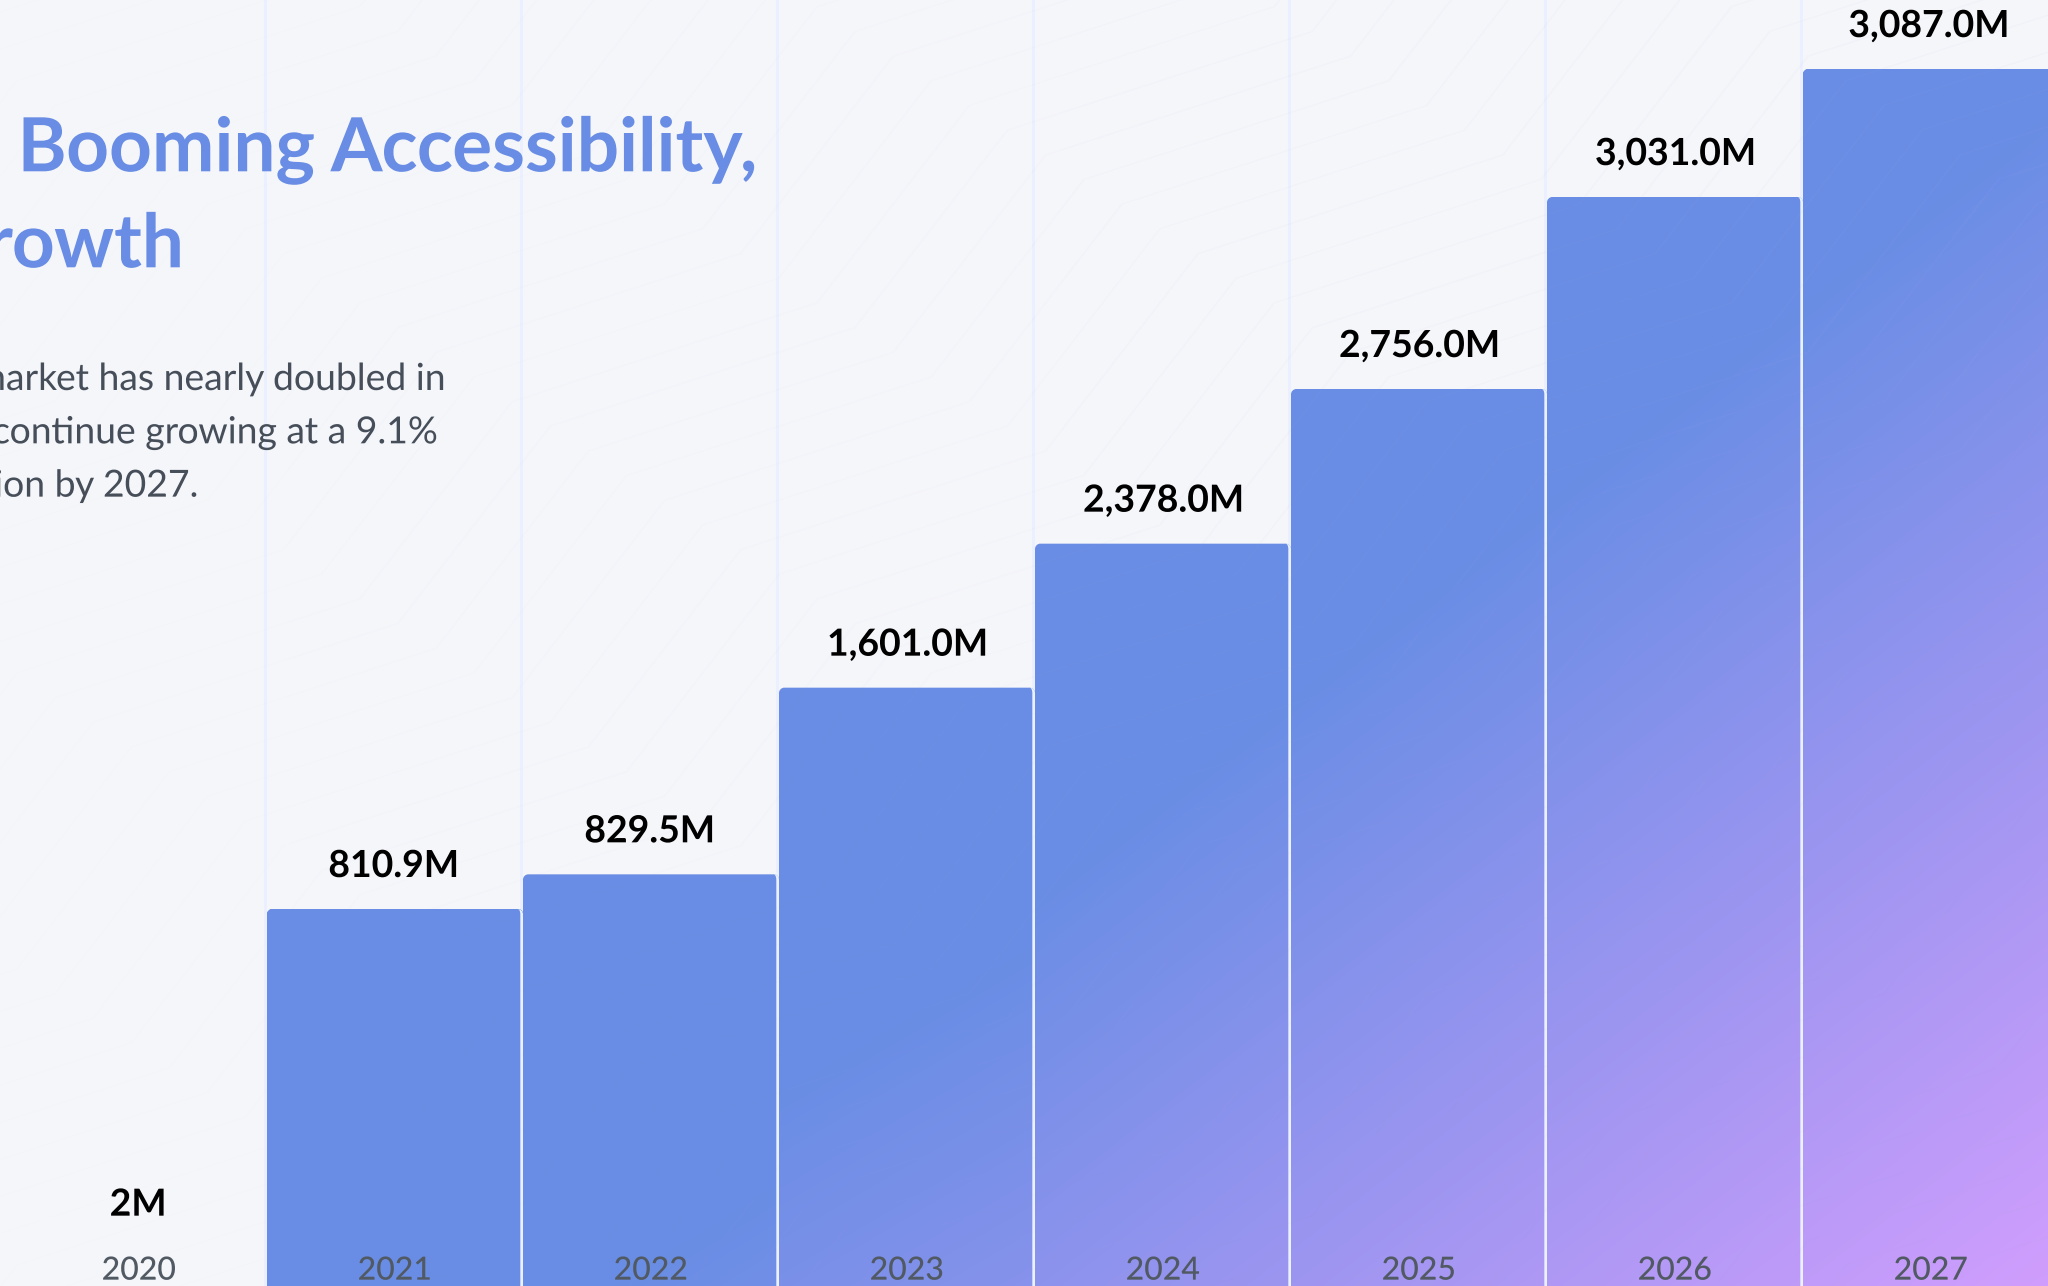

Pitch deck

NFTsky - helps artists,
collectors, and investors to
achieve peak performance in
the **NFT** market

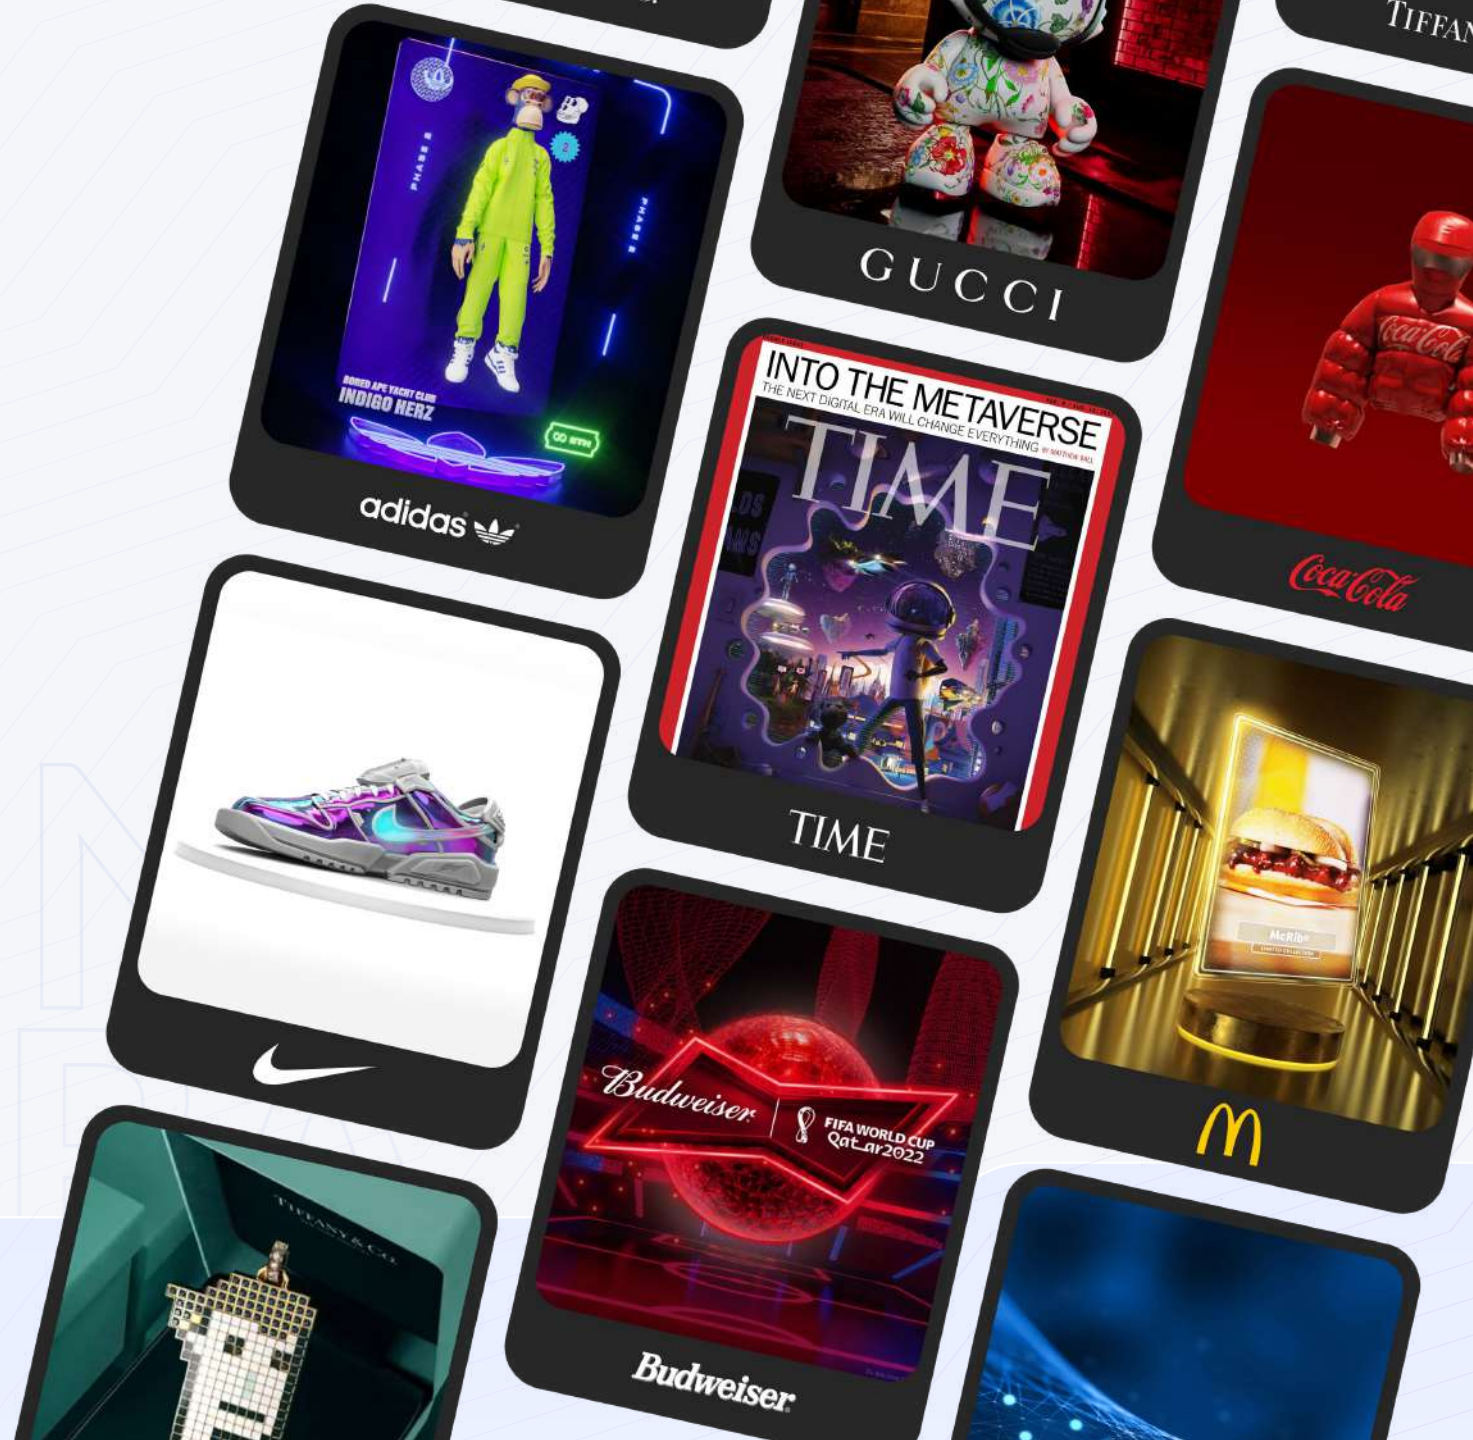

NFT Market: Booming Accessibility, Expansive Growth

The revenue in the NFT market has nearly doubled in 2023, and is expected to continue growing at a 9.1% CAGR to reach ~ \$3.1 billion by 2027.

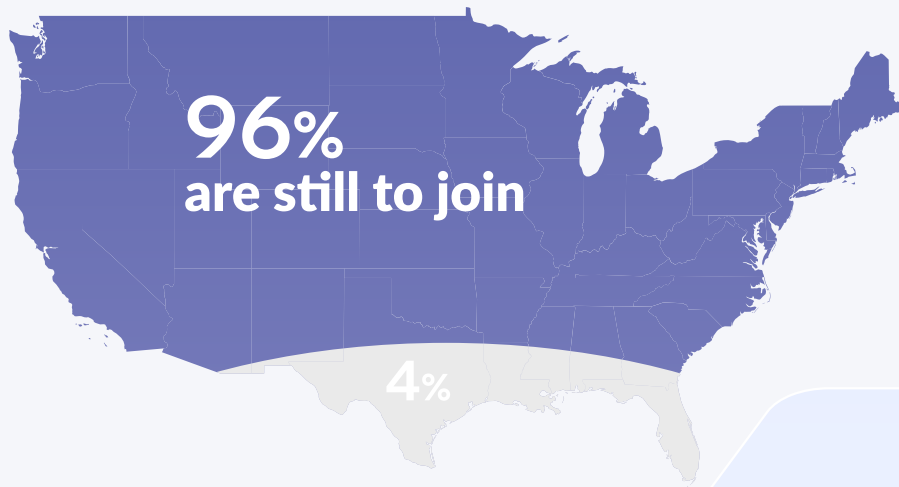

NFTs in the Real World: Expanding into Various Industries

From real estate deals and security certificates to ticketing solutions, carbon offsetting and even charitable endeavors, NFTs are revolutionizing traditional industries.

Only 4% of the US population owns NFTs

The number of users has increased by 150% over the past three years, with the user penetration rate growth of 50%.

USERS

AVERAGE REVENUE PER USER

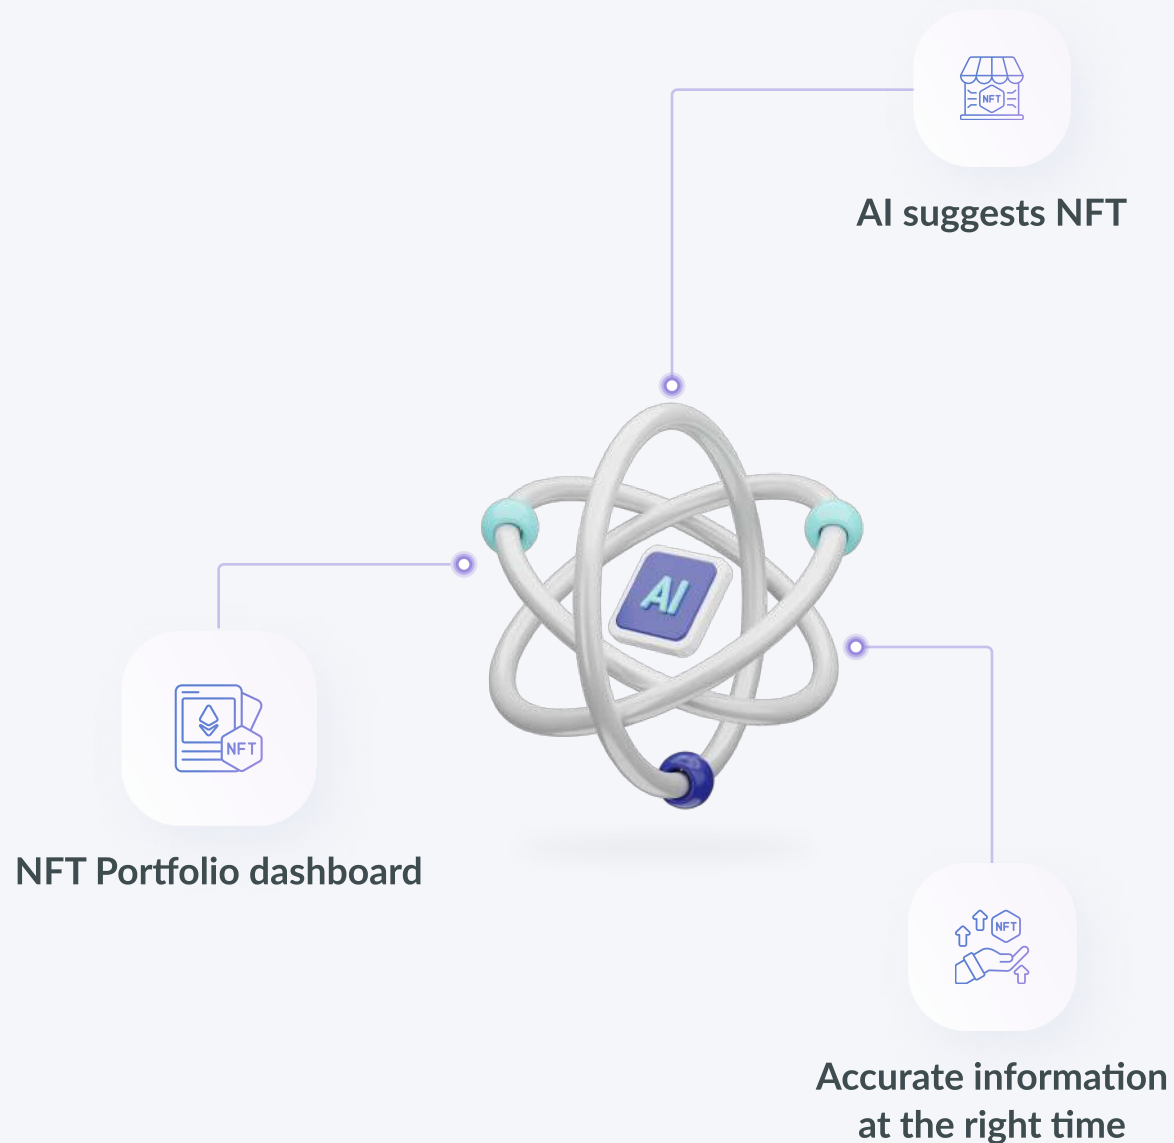

FEATURE #2

One-click AI-powered NFT portfolio management

How it works

- 1 The user indicates the preferences for the NFT portfolio parameters like the quantity, floor price, volatility, blockchain.
- 2 AI analyzes NFT marketplaces and provides a tailored-made portfolio suggestion available for the client to purchase.
- 3 The client has the flexibility to buy individual suggested NFTs, or one-click buy the entire portfolio.
- 4 The client saves hours of research time, while receiving a well-balanced personalized portfolio of NFTs.

FEATURE #1

AI-based fNFTs: sell more & faster

How it works

- 1 The NFT holder provides the collection for AI to evaluate.
- 2 AI analyzes the NFT collection based on the key parameters.
- 3 The fNFT initiator receives a recommendation about the possible price of the NFT and the number of shares to split.
- 4 The client confirms the parameters proposed by the AI and issues the fNFT.
- 5 NFT shares become available for purchase and automatically get listed within the marketplace.

AI-based NFT valuation

AI-based NFT fractionalization

Marketplace with high liquidity

FEATURE #3

AI-powered trading tools: More profit, less risk

How it works

- 1 User selects the position opening parameters based on personal strategy.
- 2 User specifies the position parameters T/P and S/L .
- 3 When the price reaches a specified threshold, the system puts the NFT up for purchase/sale.
- 4 When the order is executed, the trader fixes the profit.
- 5 Auto-convert & auto-withdrawal tools allow to collect the proceedings of NFT sales in a specified currency and wallet.

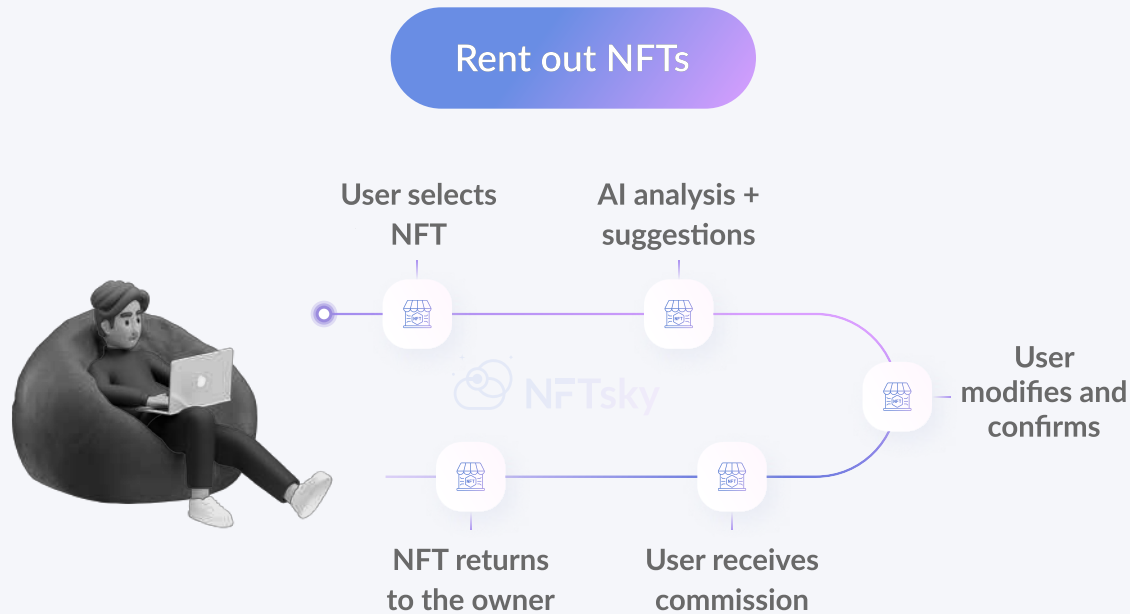

High-tech AI trading tools on the NFT market

Professional trading tools

FEATURE #4

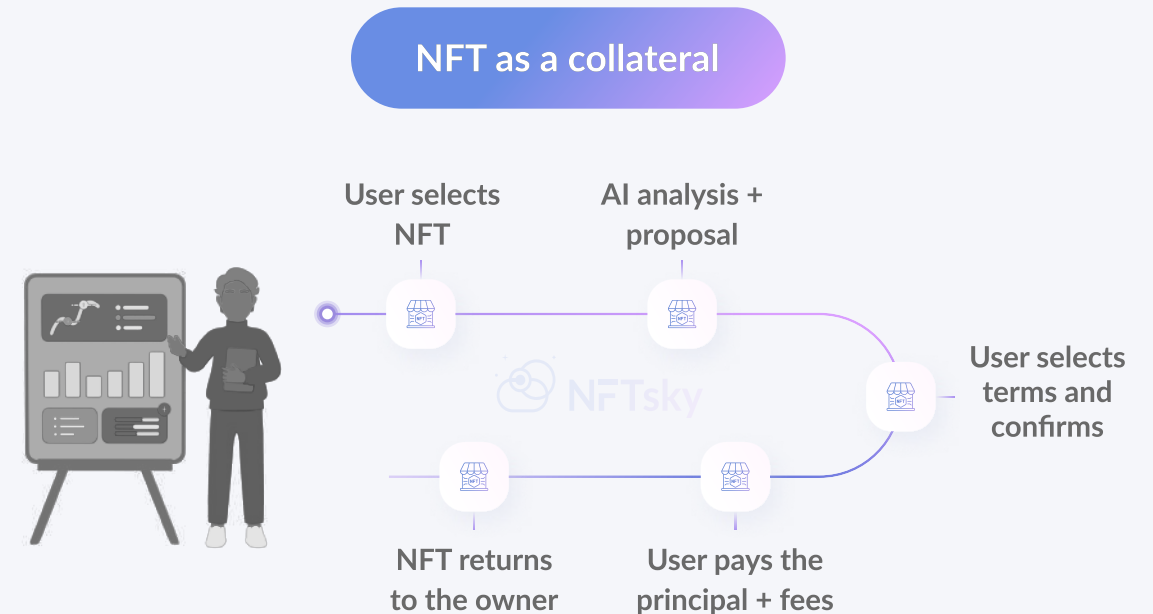

Rent out your NFTs

AI analyzes a wide range of data factors to assess the value of an NFT, including its rarity, popularity, and historical sales data.

FEATURE #5

Borrow against your NFTs

The AI model calculates the maximum loan amount and the best terms that can be issued to the borrower.

Advantages

AI-based NFT portfolio management

AI-powered advanced notifications

Multi-chain support:
ETH, BNB, Polygon

NFT promotion module

NFT Derivatives

NFT Loans

AI-based fNFT

NFT Rental

Lazy minting

Utility token

High-level security

24/7 Support

White-label

Roadmap Milestones

2024

Q2

- Token page update
- SKY private sale start
- Data aggregation from marketplaces
- Lazy mint
- Buy NFT for SKY token with discount
- Pay comission in SKY token
- STARKNET support

Q3

- Smart contract launch
- NFTsky IDO
- AI suggestions about NFTs in the portfolio
- P&L for deal and portfolio
- Dashboard, metrics, infographics
- Operations history for NFT portfolio
- SKY token locking for advanced features
- ETH support

Q4

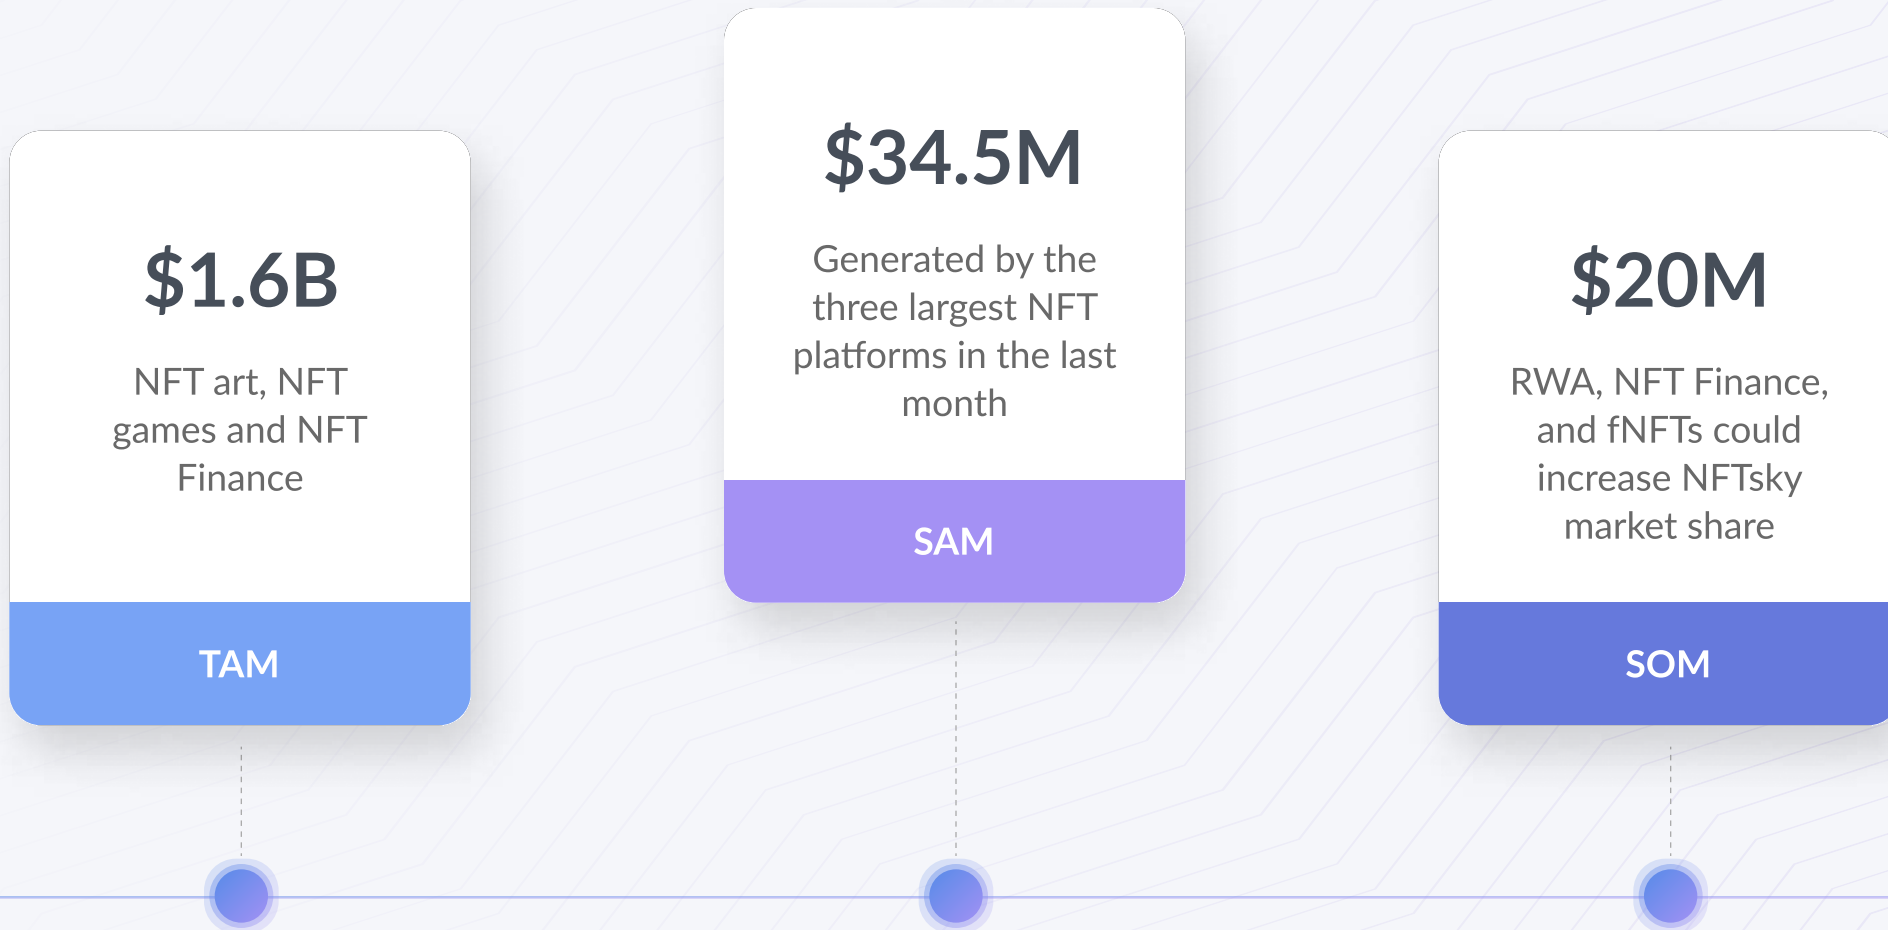

- AI-based NFT valuation
- AI-based signals and notifications
- AI-based NFT fractionalization
- API for NFT price valuation provided by AI
- Pay for subscription in SKY token
- BSC support
- Polygon support

2025

Q1

- NFT rental
- Customizable functions for TP/SL, limit, pending
- API
- NFT loans
- NFT futures
- API for futures trading
